

Do I need Universal Fit glasses?

If your glasses touch your cheeks or your eyelashes brush up against them, try Universal Fit frames.

Also known as **Low Nose Bridge**, **Global Fit** or **Alternative Fit**, these frames:

- Feature slightly bigger pads on the nose bridge area of the frame
- Sit higher on your nose to help lift the frame off your face
- Create a better fit for anyone with a round face, a low or flat nose bridge, or high cheekbones
